

Bob: I'm looking for a package to help with the layout of an interview transcript are there any good packages to do such a task. If possible could you provide a minimum working example?

Billy Bob: I'm looking for a package to help with the layout of an interview transcript are there any good packages to do such a task. If possible could you provide a minimum working example?

Xavier Xanadu III: Perhaps something that aligns the names to the text, and uses a columnar layout for the people vs what they said.
