

Visual TikZ

Version 0.63

Jean Pierre Casteleyn
IUT Génie Thermique et Énergie

mis à jour le 27 octobre 2016

Objectifs :

- Avoir une image par commande ou par paramètre.
- Avoir un texte réduit au strict minimum.
- Le plus complet possible au fil de mises à jour régulières.
- Garder la même structure que visuel pstricks

Remarques : Le code donné est minimal et ne sert qu'à montrer les commandes concernées. Les effets sont parfois exagérés pour bien les mettre en évidence. Pour en savoir plus, vous pouvez voir la documentation. Pour se faire j'ai indiqué le numéro de Section de pgfmanual

Vous pouvez me contacter à mon e-mail personnel pour

- me signaler les erreurs que vous avez constatés (merci d'indiquer la page où vous l'avez constaté)
- me faire part de vos commentaires, suggestions ...
