

Let's try to indicate one URL `http://link-1/#1` and another `http://link-2/#2`. Let's try to indicate one old URL `http://link-1/#1` . and one more `http://link-3/#3` and another `http://link-4/#4` and then the same `http://link-4/#4` . I would like to indicate something <sup>1</sup>.

---

<sup>1</sup>... but here !

<sup>#1</sup> Full address 1: `http://www.google.fr/`

<sup>#2</sup> Full address 2: `http://tex.stackexchange.com/`

<sup>#3</sup> Full address 3: `http://tug.org/texlive/pkginstall.html`

<sup>#4</sup> Full address 4: `http://www.ctan.org/`

Just only old URLS <http://link-1/#1> (*see on the preceding page*) and <http://link-4/#4> (*see on the previous page*). I would like to indicate something<sup>2</sup>.

---

<sup>2</sup>... but here !

Just only old URLS <http://link-1/#1> (*see on page 1*) and <http://link-4/#4> (*see on page 1*). I would like to indicate something <sup>3</sup>.

---

<sup>3</sup>... but here !
