The tocdata package

v2.04 — 2020/07/15

© 2016-2020 Brian Dunn bd@BDTechConcepts.com

Optionally prints author, artist, or other data on a line of the ${\tt TOC/LOF}.$

Abstract

The tocdata package adds information such as an author or artist to an entry in the table of contents or list of figures or new float type. This new information is placed on a single line along with the caption and page number, as is commonly done in collections of literature, poetry, or art work.

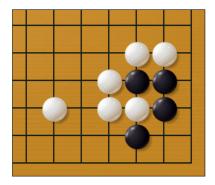

tocdata works with the TOC/LOF formatting of the default LATEX classes, memoir, koma-script, and with titletoc, tocloft, tocbasic, and tocstyle.

Problem 1-2, from Gokyo Shumyo

Figure 1: A Challenge

"Go uses the most elemental materials and concepts — line and circle, wood and stone, black and white — combining them with simple rules to generate subtle strategies and complex tactics that stagger the imagination."

Iwaмото Kaoru — former Honinbo title holder

Quotation 1: Go uses the most elemental materials and concepts ...

1 Introduction

— Brian Dunn

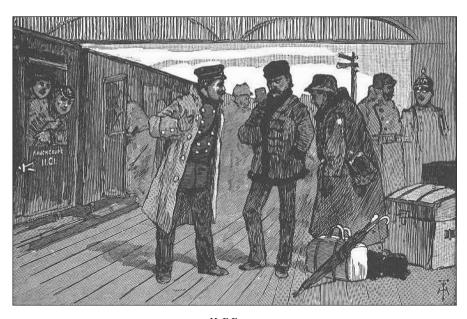

Anthologies may be printed with the author alongside each title in the table of contents. Many commonly-recommended methods for doing this with LATEX, such as those linked to in section 2, place the author above or below the title and page number, but seldom on the same line.

The tocdata package provides some basic infrastructure to help add some information to a line in the table of contents, after the title and just before the page number. This function works with the standard LATEX classes, or with either of the titletoc or tocloft packages.

Additionally, user-level macros are provided which add the author's name to a chapter or section, and add the author's or artist's name and optional additional text to a figure. Author and artist names are also added to the index.

As examples of the use of these high-level macros, the major section headings of this documentation have the author's name applied, and additional figures, illustrations, and quotes are supplied as well. The results are demonstrated in the table of contents, list of figures, list of illustrations, list of quotes, and the index. ¹

 $^{^1}$ Yes, I do recognize the absurdity of placing my own name in the index amongst the likes of Churchill, Genbi, Herschel, Kaoru, Newton...

H. F. FARNY Illustration from *The Crazy Engineer* McGuffey's Fifth Eclectic Reader

Illustration 1: The Crazy Engineer

2 Other methods

— Various Authors

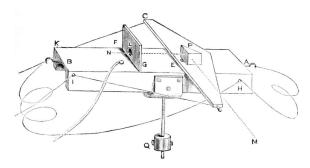

For other methods which place the author on a separate line from the title, see the following.

Note that these methods will be preferable if a larger amount of information is to be placed for each title, such that it usually would not all fit on one line in the table of contents.

http://tex.stackexchange.com/questions/ 47554/add-authors-name-automatically-while-building-toc

http://tex.stackexchange.com/questions/ 110218/add-author-before-chapter-title-in-toc

Astronometer made to compare the light of certain stars by the intervention of the moon.

Figure 2: Astronometer

3 How to use tocdata

— Brian Dunn

This section shows how to use the tocdata package.

There are several layers of macros:

- The lowest level provides the basic infrastructure for inserting information into the table of contents, along with hooks for the titletoc and tocloft packages.
- The intermediate-level macro is \tocdata, which may be used to manually add a piece of data to a \chapter, \section, or \caption. \tocdataformat is also provided to control the appearance of this data in the TOC/LOF.
- At the highest level is a sample implementation of user-level macros which
 provides an easy way to create chapters, sections, and figures with associated
 authors and artists, along with supplemental information for figures, and automatic index entries.

3.1 Basic setup

3.1.1 Preamble

tocdata may be used with either the tocloft or titletoc package, or neither.

In the preamble, use:

```
\usepackage{tocdata}
\usepackage{titletoc}% optional
\usepackage{tocloft}% optional
```

3.2 Mid-level applications

Should the user only wish to add a bit of text into the TOC/LOF, the \tocdata macro may be used just before the sectioning or caption command, as shown below.

3.2.1 Font control in the TOC/LOF

```
\tocdataformat \{\langle text \rangle\}
```

To control the font and formatting used for the author on the table-of-contents line, the default is:

```
\newcommand{\tocdataformat}[1]{{\normalfont\textit{\small#1}}}
```

You may change to other font options, add parenetheses, etc.:

```
\renewcommand{\tocdataformat}[1]{%
    \normalfont\textsc{\footnotesize\qquad --- (#1)}%
}
```

3.2.2 Adding Toc data per section

```
\tocdata \{\langle list \ extension \rangle\} \{\langle text \rangle\}
```

Before each \chapter or \section which is to have an author or other data:

```
\tocdata{toc}{Author's Name}
\chapter{Chapter Title} -or- \section{Section Title}
```

3.2.3 Adding LoF data per figure

Before each \caption which is to have an artist or author:

```
\tocdata{lof}{Artist's/Author's Name}
\caption{Figure Title}
```

You may wish to print the artist's name in the figure as well.

3.3 High-level user macros

Additional macros are given in section 4.8. These are user-level sectioning and captioning commands which add the names to the TOC and LOF, and also add the artist's name and optional additional text to a figure or other float (as in Figure 2), and also add the names to the index. An optional prefix and suffix may be attached to the names (as in Figure 2), and these will be printed at the section heading or caption, but not in the TOC/LOF or in the index.

These macros may be ignored or modified as needed.

3.3.1 Sectioning commands with authors

\partauthor \chapterauthor \sectionauthor \subsectionauthor To use these macros, do not use \tocdata as shown above, but instead use, in the place of \part:

\partauthor[list entry]{Title}[Prefix]{First}{Last}[Suffix]

Likewise for chapters, sections, and subsections.

3.3.2 Figure captions with author/artist names and additional text

\captionartist \captionauthor

\captionartist For figures, in the place of \caption, use:

```
\captionartist[list entry]{Title}[Text][Prefix]{First}{Last}[Suffix]
-or-
\captionauthor[list entry]{Title}[Text][Prefix]{First}{Last}[Suffix]
```

By default, \captionartist prints the artist centered below the figure, and \captionauthor prints the author below and flush right, without an extra vertical skip.

⚠ Optional arguments

If you are using the optional prefix, the optional text must also be given, even if it is empty. For example, use:

```
\captionartist{Title}[][Sir]{Isaac}{Newton}
```

(If only one optional argument is given before the first name, it will be interpreted as the optional text, not as the optional prefix.)

\captionartist*
\captionauthor*

If you are using the caption package or another package which supports \caption*, you may use \captionartist* and \captionauthor* with tocdata. The artist/author and supplemental text will still be printed below the figure, and an unnumbered caption will be generated, even though a LOF entry will not be made.

 Λ

caption package

Should you mistakenly use \captionartist* or \captionauthor* without the caption package, expect to get a caption with a visible star in it. To fix the problem: \usepackage{caption}

3.3.3 Formatting in sections and figures

\tocdatapartprint \tocdatachapterprint \tocdatasectionprint \tocdatasubsectionprint To change the formatting of the author names printed after each chapter or section, or to remove them entirely, use these macros, as described in section 4.8 on page 20.

\tocdatachapterprint and \tocdatasectionprint by default depend on \tocdatapartprint, so if it is redefined the others will have to be redefined as well.

\tocdataartistprint
\tocdataartisttextprint
 \tocdataauthorprint
\tocdataauthortextprint

To change the formatting of a figure's artist's name or author's name and optional text, use these macros, also described in section 4.8.

3.3.4 Text justification

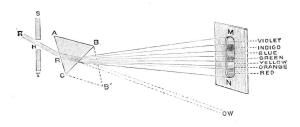

\tdartistjustify \tdartistcenter \tdartistleft \tdartistright \tdartisttextjustify \tdartisttextcenter \tdartisttextleft \tdartisttextright \tdauthorjustify \tdauthorcenter \tdauthorleft \tdauthorright \tdauthortextjustify \tdauthortextcenter \tdauthortextleft \tdauthortextright

The text alignment of artists, artists' additional text, authors, and authors' additional text may be set using these macros. All following figures use the selected justification until it is changed to another.

4 Implementation

— Brian Dunn

Below, the tocdata code section contains the low-level code used to place the data into the table of contents and list of figures, as well as the code to control the font used while doing so.

Next are sections used to support the default LATEX classes, as well as titletoc and tocloft.

Finally, the high-level macros are provided. The user may ignore or redefine these as desired.

4.1 Requirements

```
1\RequirePackage{xparse}
2\RequirePackage{etoolbox}
3\RequirePackage{xpatch}
```

Require that titletoc and tocloft be loaded after tocdata, so that tocdata can patch the LATEX core definitions first.

```
13
14 \@ifclassloaded{memoir}
15{}% memoir
16{% not memoir
17
18 \@ifpackageloaded{tocloft}{
19
      \PackageError{tocdata}
          {%
20
               Load tocloft after tocdata%
21
          }
22
          {%
23
          Move \protect\usepackage{tocloft} after \protect\usepackage{tocdata}.%
24
26 }{}
27
28}% not memoir
```

Prevent the use of both titletoc and tocloft.

```
29 \AtBeginDocument{
30 \@ifpackageloaded{titletoc}{
      \@ifpackageloaded{tocloft}{
31
          \PackageError{tocdata}
32
33
                   Both titletoc and tocloft are being used.\MessageBreak
34
                   Load only one%
35
              }
36
              {%
37
             The tocdata package may use the default LaTeX formatting, \MessageBreak
38
                   or either one of titletoc or tocloft.
39
              }
40
41
      }{}
42 }{}
43 }
```

4.2 tocdata code

\tocdata $\{\langle toc \ or \ lof \rangle\} \{\langle text \rangle\}$

\TD@thistocdata Storage for the data to be added to the end of the TOC entry:

```
44 \newcommand{\TD@thistocdata}{}
\settocdata Written to the .toc or .lof file, assigns \TD@thistocdata:

45 \newcommand{\settocdata}[1]{\renewcommand{\TD@thistocdata}{#1}}
```

To be called by a higher-level macro to assign data to a . toc or .lof file:

\tocdatafont $\{\langle text \rangle\}$ deprecated fine \toc

 $\{\langle \textit{text} \rangle\}$ Provided for compatibility with older documents. Instead, use and redefine \tocdataformat for newer documents.

```
49 \newcommand {\tocdatafont}[1] { \{\normalfont \textit {\small \#1}}}
```

\tocdataformat $\{\langle text \rangle\}$

Controls the font and formatting for the TOC data:

```
\renewcommand{\tocdataformat}[1]{\textit{#1}}
50\def\tocdataformat{\tocdatafont}
```

\TD@usetocdata

To be inserted into low-level Toc-generation code where the data should appear.

See the example using titletoc, below.

Prints the data, then clears the storage so it is not printed again.

```
51\newcommand{\TD@usetocdata}{%
52 \ifdefvoid{\TD@thistocdata}{}{%
53 \tocdataformat{\TD@thistocdata}%
54 \global\def\TD@thistocdata{}%
55 }%
56}
```

\TD@checktocdatafont $\{\langle text \rangle\}$

Used to detect whether the user redefined \tocdatafont, in which case a warning is issued to use \tocdataformat instead.

```
57\let\TD@checktocdatafont\tocdatafont
58
59\AtBeginDocument{
60\ifdefequal\TD@checktocdatafont\tocdatafont{}{
61 \PackageWarningNoLine{tocdata}{%
62 You have redefined \protect\tocdatafont,\MessageBreak
63 which has been deprecated. Please redefine\MessageBreak
64 \protect\tocdataformat\space instead}
65 }
66 }
```

4.3 Standard LATEX patches

 $\verb|\TD@patchstandard| I a text{$ Patches standard } I a text{$ I = 1 $ } TEX \ toc \ formatting.$

110
111
       }%
112 }{}
```

113 }% TD@patchstandardlatex

Patch standard LATEX if not using lwarp, or if lwarp is used in print mode:

```
114 \@ifpackageloaded{lwarp}{%
       \ifbool{warpingprint}{\TD@patchstandardlatex}{}%
115
116 }{%
       \TD@patchstandardlatex%
117
118 }
```

titletoc support

If titletoc is loaded, patch macros for its use:

```
119 \AtBeginDocument{
120 \@ifpackageloaded{titletoc}{
```

\titlecontents A set of titletoc commands which set up the formatting of the TOC entries. These are patched \AtBeginDocument, after user customizations in the preamble, to include the tocdata just after the leader (titlerule*), and just before the page number.

> These macros also include spacing commands, and thus may need to be redefined by the user.

The default macros are patched via the LATEX core. The following are only necessary if \titlecontents was used. Since every combination is tried, but will only succeed if \titlecontents was used, no warnings are printed if the patch fails.

```
121 \newcommand*{\TD@titletoc@patch}[1]{%
       \verb|\expandafter\xpatchcmd\csname| ttl@savel@#1\endcsname|
122
           {\nobreak\hfil\nobreak}

SIR ISAAC NEWTON

Figure 5: Sir Isaac Newton's Astrolabe

4.8 User-level macros

Example user-level macros follow.

These macros are in addition to the standard sectioning and caption commands, adding first and last names for the table of contents and list of figures. For parts, chapters, sections, and subsections, the author's name with optional prefix and suffix are also added below the title. For figures, \captionauthor also prints the figure's artist's name with optional prefix and suffix just below the figure.

The regular sectioning and caption commands may still be used for anything which does not have an author/artist name.

4.8.1 User customization

\TDoptionalnameprint $\{\langle name \rangle\}$

Adds optional artist's name and the following space.

```
241 \newcommand{\TDoptionalnameprint}[1]
242 {%
243
       \ifblank{#1}%
244
       {}%
       {#1~}%
245
246 }
```

```
\label{eq:conditional} $$ \condition{ $$ (prefix) $ {\langle first \rangle $ {\langle last \rangle $ } {\langle suffix \rangle $ } $}
```

User-redefinable macro to print the author's name underneath the part title.

```
247 \newcommand{\tocdatapartprint}[4]
248 {%
249
       \par\noindent%
250
       {%
           \normalfont\normalsize%
251
           \textit{%
252
                \hspace*{4em}--- %
253
                \TDoptionalnameprint{#1}\TDoptionalnameprint{#2}#3#4%
254
           }%
255
       }%
256
257 }
```

```
\tocdatachapterprint \{\langle prefix \rangle\} \{\langle first \rangle\} \{\langle last \rangle\} \{\langle suffix \rangle\}
```

User-redefinable macro to print the author's name underneath the chapter title.

```
258 \@ifundefined{chapter}
259{}% if no chapters
260\,\% only of chapters exists in this documentclass:
      \let\tocdatachapterprint\tocdatapartprint
262}% end of chapters-only
```

```
\tocdatasectionprint \{\langle prefix \rangle\} \{\langle first \rangle\} \{\langle last \rangle\} \{\langle suffix \rangle\}
```

User-redefinable macro to print the author's name underneath the section title.

263 \let\tocdatasectionprint\tocdatapartprint

```
\ttocdatasubsectionprint \{\langle prefix \rangle\} \{\langle first \rangle\} \{\langle last \rangle\} \{\langle suffix \rangle\}
```

User-redefinable macro to print the author's name underneath the subsection title.

264 \let\tocdatasubsectionprint\tocdatapartprint

```
 \begin{tabular}{ll} $$ $$ $$ TDartistauthorprint $$ {\langle 1: "artist" or "author" \rangle} $$ {\langle 2: prefix \rangle} $$ {\langle 3: first \rangle} $$ {\langle 4: last \rangle} $$ {\langle 5: suffix \rangle} $$ $$

```

4.8.2 Chapters and sections

\textsquare \mathbb{\text{part*}} With book or report classes, a starred \part's name is printed on its own page, making it difficult to add an author's name. If the author's name is appended to the part's name, it also appears in name references as well. Thus, if using one of these classes and a starred \part, the author's name is not printed. Using an unstarred \part with an author's name does work as expected. The author's name is printed as part of the long name, but does not appear in the name reference, which uses the short name.

                     4.8.6 Figure author text alignment
\TD@authortextalign Sets text alignment in the optional text.
                    381 \newcommand{\TD@authortextalign}{\centering}
\tdauthortextjustify Sets justified text alignment in the optional text.
                    382 \newcommand{\tdauthortextjustify}{%
                           \renewcommand{\TD@authortextalign}{}%
                    383
                    384 }
\tdauthortextcenter Sets centered text alignment in the optional text.
                    385 \newcommand{\tdauthortextcenter}{%
                           \renewcommand{\TD@authortextalign}{\centering}%
                    387 }
  \tdauthortextleft Sets left text alignment in the optional text.
                    388 \newcommand{\tdauthortextleft}{%
                           \renewcommand{\TD@authortextalign}{\raggedright}%
                    389
                    390 }
 \tdauthortextright Sets right text alignment in the optional text.
                    391 \newcommand{\tdauthortextright}{%
                           392
                    393 }
```

4.8.7 Figure captions with artists and authors

These macros adds optional supplemental text, which will be printed below the artist's name and above the caption, presuming that the caption is generated below the figure.

⚠ Optional arguments

If using the optional prefix, the optional text must also be given, even if it is empty. For example, use:

```
\captionartist{Title}[][Sir]{Isaac}{Newton}
```

If only one optional argument is given before the first name, it will be interpreted as the optional text, not as the optional prefix.

 $\verb|\TD@captionartistauthor||$

```
\{\langle 1: "artist" \ or "author" \rangle\} * [\langle 3: LoF \ entry \rangle] \{\langle 4: title \rangle\} [\langle 5: supplemental \ text \rangle] [\langle 6: prefix \rangle] \{\langle 7: first \rangle\} \{\langle 8: last \rangle\} [\langle 9: suffix \rangle]
```

Factored from \captionartist and \captionauthor, below.

```
394 \NewDocumentCommand{\TD@captionartistauthor}{m s o m +0{} 0{} m m 0{}}{% or m +0{} 0{} m m 0{} 0{}}{% or m +0{} 0{} m m 0{}}{% or m +0{} 0{}}{% or m +0{} 0{} m m 0{}}{% or m +0{} 0{}}{% or m +0{}}{% or m +0{} 0{}}{% or m +0{}}{% or m +0{}}{
```

Print the artist's name next to the figure:

```
395 \csuse{tocdata#1print}{#6}{#7}{#8}{#9}%
```

If supplemental text is provided, print it below the author:

```
396 \ifblank{#5}%
397 {}%
398 {\par\csuse{tocdata#1textprint}{#5}}%
```

Remove any existing vertical space and only use \caption's built-in spacing:

```
399 \unskip%
```

If starred, there should be no TOC entry, so do not add tocdata. Use \caption* from the caption or similar packages.

No starred, so remember the artist's name for inclusion in the LOF:

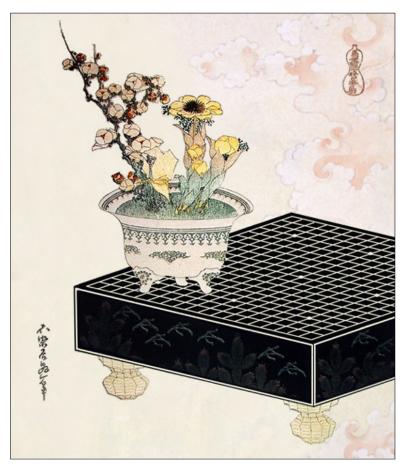

```
405 \tocdata{\csuse{ext@\@captype}}{#7 #8}%
```

Create the caption depending on the optional name:

```
406
   }% not starred
407
```

Create an index entry depending on whether there is a first name:

```
408
                                \ifblank{#7}%
                      409
                                      {\index{#8}}%
                      410
                                      {\index{#8, #7}}%
                      411 }
\captionartist * [\langle 2: LOF \ entry \rangle] \{\langle 3: title \rangle\} [\langle 4: supplemental \ text \rangle] [\langle 5: prefix \rangle] \{\langle 6: first \rangle\}
                      \{\langle 7: last \rangle\} [\langle 8: suffix \rangle]
                      * [\langle 2: LOF \ entry \rangle] {\langle 3: title \rangle} [\langle 4: supple mental \ text \rangle] [\langle 5: prefix \rangle] {\langle 6: first \rangle}
\captionauthor
                      \{\langle 7: last \rangle\} [\langle 8: suffix \rangle]
                      413 \newcommand*{\captionauthor}{\TD@captionartistauthor{author}}
```

Katsushika Hokusai

From the series *Uma Zukushi*.

Change History

v0.10	Replaced \tocdatafigtextprint
General: 2016/05/05 Initial ver 1	with \tocdataartisttextprint
v0.11	and \tocdataauthortextprint. 22
General: 2016/07/11 1	\partauthor: Added 24
Minor docs improvements in	\subsectionauthor: Added 25
spelling, grammar, formatting 1	\tocdataartistprint: Added 22
v0.12	\tocdataauthorprint: Added 22
\TD@captionartistauthor: Allows	\tocdatachapterprint: Renamed
paragraphs in add'l text 28	from \tocdatachapprint 2
Expands first name before index	\tocdatapartprint: Added 21
check 28	\tocdatasectionprint: Renamed
\TD@sectionauthor: Expands first	from \tocdatasecprint 2
name before index check 24	\tocdatasubsectionprint: Added. 21
\TDartistauthortextprint: Added	General: 2019/03/15
text alignment	Added caption authors
Improved spacing	Added part and subsection macros.
\tdartistjustify: etc. Added name	Added support for new float types.
alignment	Adds support for default LATEX TOC
\tdartisttextjustify: etc. Added text alignment	formattting, without using titletoc
\tdauthorjustify: etc. Added name	or tocloft 14
alignment	Improved patches for titletoc 16
\tdauthortextjustify: etc. Added	Improved patches for tocloft 17
text alignment 27	Patches \AtBeginDocument 15, 16
\tocdataartistprint: Added name	Replaced \tdnameX with
alignment	\tdauthorX and \tdartistX 25
Improved spacing 22	Test for both titletoc and tocloft 12
\tocdatapartprint: Improved	Test for early titletoc or tocloft 11
spacing 21	v2.01
General: 2016/12/02 1	\lesection: Fix for LATEX core section
Added requirement for xifthen 11	тос entry
v1.00	General: 2019/03/15
General: 2019/01/12 1	v2.02
Improved source formatting 1	\TD@sectionauthor: Fix: Sectioning
Remove xifthen dependency 11	name formatting 24
v2.00	\tocdataartistprint:Improved
\TD@captionartistauthor: Added	spacing
support for new float types 28	\tocdataauthorprint:Improved
Factored 28	spacing
\TD@sectionauthor: Factored 24	General: 2019/03/21
Improved page breaks 24	Docs: Fix macro names
\TDartistauthorprint:Improved	v2.03
font control	\TD@sectionauthor: Fix: Starred
\TDartistauthortextprint:	sectioning name formatting and
Improved font control 22	labels

\ID@starredsectionauthorprint:	Added support for memoir 14
No author for \part* in book	\l@part: Added support for
class 23	koma-script 14
\TD@usetocdata: Fix: No action if	Added support for memoir 14
empty data 13	\1@section: Fix: Only patch if article. 15
Uses \tocdataformat instead of	\tocdatapartprint: Removed
\tocdatafont 13	\unskip 21
\TDartistauthorprint: Name	General: 2019/07/06 1
changed from	Added support for memoir 11, 16
\TD@artistauthorprint 22	Added support for tocbasic 17
\TDartistauthortextprint: Name	Added support for tocstyle 18
changed from	Fix: Don't try to patch lwarp 14
\TD@artistauthortextprint 22	Tested to work with
\TDoptionalnameprint: Name	\dottedcontents 15
changed from	v2.04
\TD@optionalnameprint 21	
\lechapter: Added support for	General: 2020/07/15
koma-script 14	Updated for tocbasic v3.30 17

Index

Numbers written in italic refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in roman refer to the code lines where the entry is used.
