Listing 1: highlight all identifiers

```c
#include <stdio.h>
int main()
{
  float a, b, c;
  printf("Enter a, b, and c (space separated) in the
      following equation:\nax^2+bx+c = 0\n");
  scanf("%f %f %f", &a, &b, &c);
  printf("What happens when I type two less-than signs
      like this? <<\n");
}
```

Listing 2: highlight specific words

```c
#include <stdio.h>
int main()
{
  float a, b, c;
  printf("Enter a, b, and c (space separated) in the
      following equation:\nax^2+bx+c = 0\n");
  scanf("%f %f %f", &a, &b, &c);
  printf("What happens when I type two less-than signs
      like this? <<\n");
}
```
